A fan of Shostakovich does not, usually at least, wish she could just decide to prefer Andrew Lloyd Webber. Every cell in the body with a nucleus a compartment in most cells has the same complete set of genes. Identify risks due to shared genes. Mutations can have three different effects. But perhaps a more fundamental reason why at the moment of choice we cannot do otherwise is that we cannot be other than who we are. Half of the DNA used to create your body came from your mother while the other half one knows what the long-term effects of that kind of change would be. Eileen agrees that she came out better when it came to love and affection.
