Adding coloured dye to bubble mixtures fails to produce coloured bubbles, because the dye attaches to the water molecules as opposed to the surfactant. Archived from the original on

All these rules, known as Plateau's laws determine how a foam is built from bubbles. I love this intuitive way of looking at it. The balloon reaches its balance it gets inflated at a certain level when these two forces are equal.

In Japanese astronaut Naoko Yamazaki demonstrated that it is possible to create coarsening foam drainage.
