We use In our case, thus Expand the square of the binomial But and Substitute back B and C, we get Simplify and factor out Cancel out from both sides Distribute Solve for energy E Thus, Simplify the expression to obtain the Bohr formula And the Bohr formula for the WKB Approximation in Atomic Physics state of hydrogen is given by eV Finally, we get the WKB approximation for the bound state energies of hydrogen Comment for corrections and further questions. Their Derivation and Interpretation Academic Press, The Bohr-Sommerfeld quantization is then used to investigate statistical physics in deformed spaces with the minimal length.
