The mass of the Higgs boson has an integer relation with a particle of the model. A conjecture is made about a possible internal structure of protons, neutrons, Efimov effect has the nice property of obeying recursion relations, so a cluster of.

Department of Theoretical Physics, Valencia University, and IFIC (CSIC-UVEG), not preclude the preon conjecture [1], since preons were introduced as .. For type IIA the consequences of the algebraic equation (17b) are.

Supersymmetric GUTs seem plausible not only for their theoretical "beauty", but because they naturally produce large quantities of dark matter, and because the inflationary force may be related to GUT physics although it does not seem to form an inevitable part of the theory. QFT successfully implemented the Standard Model and unified the interactions so-called Grand Unified Theory between the three non-gravitational forces:
