javascript - return new Promise() not working in dijuxucicihe.tk - Stack Overflow

The function passed to new Promise is called the executor. When the promise is created, this executor function runs automatically. It contains the producing code .

JavaScript Promises: an Introduction | Web Fundamentals | Google Developers

Before you settle down with promises, there is something that has come about to make it even easier to deal.

Promise • TypeScript Deep Dive

The Promise object represents the eventual completion (or failure) of an `var promise1 = new Promise(function(resolve, reject) {` . 2.

```
Try this: var getJson = function(URL){ var options = { method:
'GET', url: URL, headers: { authorization: 'OAuth
realTokenWouldBeHere', Accept.
```

We use new Promise to construct the promise. We give the constructor a factory function which does the actual work. This function is called immediately with two .

Rewrite the showCircle function in the solution of the task Animated circle with callback so that it returns a promise instead of accepting a callback. Never call the callback twice.

Thespecalsousesthetermthenabletodescribeanobjectthatispromise-like But more than just allowing us to handle future values, they give us a much better way to control asynchronous program flow than plain callbacks. Also, this is loading one image, things get even more complex if we want to know A New Promise a set of images have loaded. I have programmed it two ways.

Thespecalsousesthetermthenabletodescribeanobjectthatispromise-like Required, but never shown.
